

plyhouse

Product Name / Plyhouse

Function / Bookshelf, Workstation, Breakout-Meeting Space, Display structure

Description / Plyhouse is a new product commissioned originally by The Dock Gallery in Carrick on Shannon for the exhibition 'Thinking, Living, Dwelling' which was an 'exhibition designed to underpin and celebrate the extraordinary achievements of Leitrim's Green-Door Festival.' The structure was designed to display the library of architecture and design books gathered by the organisers for the festival together with artworks and information tablets.

Uses /

Plyhouse has many uses including office breakout or meeting areas, workstation, library space withing a foyer or a gallery display structure with 2D artworks suspended from the roof panels and 3D displayed on the shelves. Additional acoustic panels for inside the structure, cable management and LED lighting strips can also be ordered if required. Photos show PAL (Plywood And Laminate) stackable stools from Leo Scarff Design

Materials /

It is made from 18mm Birch Plywood but can also be ordered in veneered plywood or colour lacquer. Steel fittings come in black finish as standard.

Finishes / Colours /
