

# dodeca

Product Name / Dodeca

Function / Meeting Pod

Description /

Dodeca is an innovative meeting space or booth in the form of a primary solid called a Dodecahedron which is made up of 12 Pentagonal panels. Three panels are removed to give an opening into which an upholstered pad and pentagonal meeting table has been placed. The remaining 9 panels are bolted together via powder coated steel brackets. Each pod can hold 4 comfortably seated on the pad with room outside for another 1/2 sitters on extra chairs. The pod also contains a central pendant light above the table and can be ordered with internal sound absorption panels covered in Camira Blazer fabric. The corners of the front panels are also rounded to make it more comfortable sitting in and getting out of the pod. Each pod sits on a durable floor panel made from non-slip, textured, recycled black plastic with bevelled edges

Uses /

Dodeca is perfect for use in office spaces for focused meetings or indeed any space with requirements for small informal work groups

Materials /

Birch Plywood structure with powder coated brackets  
This is available in either clear matt lacquer or coloured lacquer finish.

Each pod can be upholstered in different fabrics or fabric colours

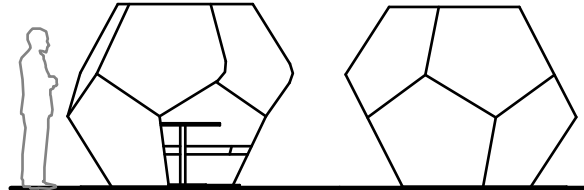

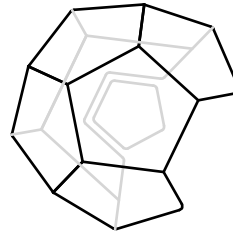

Standard fabrics used are Camira Aquarius or Blazer 100% Wool and are rated for use in commercial interiors. We also use Vinyl from the Camira range. The Pentagonal table is Formica laminate on Birch Plywood with a matt powder coated base in colours to order.

Dimensions /

HF30 H2110mm DIA2616

Other custom sizes and detailing to order
